Cleverpark Oak smoked Crema 14, B-Protect®

B-Protect®

INNOVATIVE SURFACE FINISHING

With the surface finish B-Protect®, Bauwerk proves once more that it is an innovator and is setting new standards in the sealing of parquet flooring.

Visually, the B-Protect® surface hardly differs from natural, untreated wood; functionally, it offers all the advantages of classic lacquer coating. Floors treated with B-Protect® do not need any special care, they are UV-stable, and 100% healthy for living.

B-Protect® is an invisible, multi-layer lacquer treatment that is applied during the production process. Its unique composition completely seals the surface of the parquet.

Also uniquely to B-Protect®, there are no changes in the colour of the raw wood material taking place, despite the lacquering. Surface testing has shown a reduction in the impact of UV radiation, with the original appearance of the surface lasting for years. Thus, B-Protect® offers an important feature that is unique compared to other lacquering systems.

The advantages of the B-Protect® surface:

Natural Look

All B-Protect® colors are based on nature.

Very matt finish

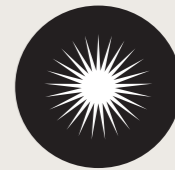

Best Protection

All the protective properties of a lacquer

UV-stable: minimum discoloration

100% healthy living

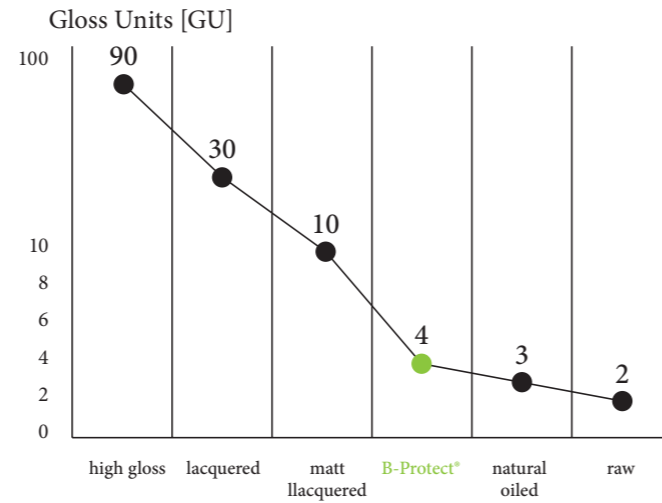

Easy Care

Very easy cleaning and care

TECHNICAL INFORMATION

Low gloss level

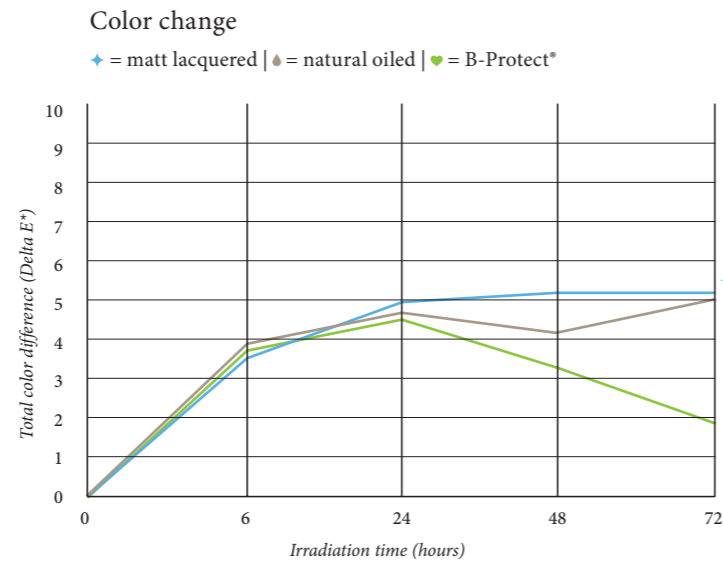

The degree of gloss of the various surface treatments differs greatly. Compared to other sealers, the B-Protect® surface has a very deep gloss level and thus a matte and natural look.

Proven color fastness

The latest findings from wood research* show that the color change resulting from UV radiation in parquet floors with the B-Protect® surface sealant is less than half that of other commercially available parquet surfaces. With a value of less than 2 Delta E*, no noticeable color difference is visible to the naked eye with B-Protect®.

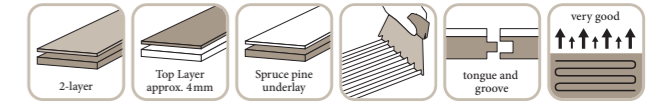

* Based on the test of light fastness according to ÖNORM A 1605-12 (parameters according to ÖNORM EN ISO 4892-2:2013 method B, behind window glass, cycle number 2) by Holzforschung Austria.

° For production reasons, every second box can contain one layer with two half-size planks.

ⓘ Your health and the environment are close to our hearts - numerous labels guarantee healthy living and sustainably manufactured products. Please visit our website bauwerk-parkett.com for detailed information on our test reports and certificates.

In 1935, Ernst Göhner brought the idea of solid parquet to series production before founding Bauwerk Parkett in 1944. Since then, Bauwerk has been researching, developing and manufacturing innovative, aesthetic parquet solutions of the highest quality with great passion and Swiss precision. Original parquet floors from Bauwerk, one of the leading parquet manufacturers in Europe, offer the unique feel of a piece of real nature that provides tangible warmth and healthy living for a perfectly balanced atmosphere in any room. *bauwerk-parkett.com*
